C1 (Fluent) – School
Certification

Programming: Python (Lego Mindstorms),
Dart (Flutter), C, C++, Java, HTML/CSS/JS,
Google Firebase, Ansible

Technical: Electronics (2015–2018),
Rubik's Cube (2x2x2, 3x3x3, 4x4x4, Ghost Cube,
Mirror Cube, Megaminx)

Digital Skills: PIX Certified – 760 points

Music: Classical Guitar (since 2011)

Sports: Climbing, Cycling, Table Tennis,
Unicycling, Waveboarding

Experience

ICT Intern

Made an AI Chatbot based on Gemini to chat with auto-crawled
custom knowledge
Automated docker build, beta deployments and tests with Gitlab CI

April – August 2025

Student Project House
ETH Zurich

Citadel AI

Developing an enterprise-grade AI chatbot platform designed to
unlock company knowledge and reduce silos. Built features for drag-
and-drop context management, real-time external integration, and
strict EU data residency compliance.

August 2025 – Present

<https://citadelai.app>

IT Project Management Intern

Self-hosted AI using Ollama, customized mistral AI models
for Matlab to Python code translation
Managed network infrastructure
LXC provisioning with Ansible

July – August 2024

Doliam

3rd place at the Awake Challenge

Created an autonomous car on a 1/10 scale circuit
using only a LiDAR and a Camera
Image processing in Python, rest of code in C

September 2023 – June 2024

Organized by
Awake Group (Innovateam)

Mathematics Tutor

Mentoring students in problem-solving methodologies and logic,
resulting in improved exam performance in mathematics and confidence.

September 2023 – Present

Academia

Application Development Commerstras (Supported by Pépité France)

Developed an application to enhance the online
presence of independent retailers

October 2022 – September 2025

Strasbourg

[https://www.dna.fr/economie/2023/07/31/
l-appli-qui-soutient-le-commerce-independant](https://www.dna.fr/economie/2023/07/31/l-appli-qui-soutient-le-commerce-independant)
